

Case Discussion

Case Discussion Instruction:

For each case discussion, please post the following on Canvas:

Post	Minimum # of words	Points
Your answers/solution to the case questions	100 words	10
How is it related to the textbook chapters?	50 words	5
Questions for the professor or the class	optional	
Your replies to at least two other students' posts	50 words per post	5

Note:

Please separate your answers/ solutions and how you relate the textbook chapter materials into two separate paragraphs so viewers can easily identify them.

Even though questions for the professor or the class are optional, I still strongly encourage you to do it because it can stimulate discussions and allow people to reply to your post.

Please put thoughts, consideration, and substance into your replies. Replies without any substance will be graded as 0. Examples include, but are not limited to:

- thank you
- good jobs
- I like your thoughts
- I think it's a great idea.

Basically, give time and real thoughts to your peer's post, and you will receive points.

DISCUSSION CASE #1 A Bigger Bookshop?

A used book dealer with a small store in downtown Columbia is considering expanding. The shop occupies a small and crowded storefront space at the street level. The book dealer wonders whether he should expand to the second floor by adding a staircase and additional selling space upstairs.

- I. What is the overall management problem?
- II. What are the major decisions this book dealer needs to make?
- III. What information does the book dealer need to make these decisions?
- IV. If you were conducting a survey to help this book dealer make these decisions, what research objectives should you have for the survey?

DISCUSSION CASE #2 Mario's Macaroni

A chain of 43 Italian restaurants in the Midwest has experienced a gradual sales decline, starting about a year ago. You have been asked to determine the cause of the decline. Explain how you could use each of the following methods to figure out what's going on.

Prepare an answer for the method associated with the first letter of your last name. You will need to obtain information about your assigned method from your textbook (primarily chapters 4 and 6).

- secondary data analysis (A-C)
- experience survey (D-G)
- focus group (H — L)
- in-depth interview (M — O)
- projective techniques (P — R)
- Observation (S, T)
- experiment (U - Z)

DISCUSSION CASE #3

Here are the [Case 3 materials](#) needed to answer the case.

A. For each research question below, indicate the research question form (descriptive, differences, or association research question).

B. In addition,

- 1) For each descriptive RQ below, describe the variable to be measured.
- 2) For each difference RQ below, describe both the grouping variable and the analysis variable.
- 3) For each association RQ below, describe the two variables to be associated.

RQ1: How often do Columbia residents buy floral items (potted plants, bouquets, arrangements, etc.)?

RQ2: Is household income associated with the frequency of buying floral items?

RQ3: Do married people buy more floral items than single people?

RQ4: Are Columbia residents more likely to buy their floral items at a supermarket or at a florist shop?

RQ5: What percentage of Columbia residents have a favorite florist?

RQ6: What percentage of Columbia residents have purchased floral items via the internet?

RQ7: Are men or women more likely to purchase floral items via the internet?

RQ8: What is the average price residents pay for floral items?

RQ9: For what sorts of occasions are they most likely to buy floral items?

RQ10: Is age related to how often a person purchases floral items?

DISCUSSION CASE #4 The Red Lion

The Red Lion, Ltd., is a chain of 13 bar restaurants located in seven major cities on the east coast. The original Red Lion was opened in 2003 by Albert Campion, an English expatriate. The chain is modeled after the typical English pub. Much of the equipment and furnishings have been collected from actual pubs throughout the British Isles. The Red Lion sells typical English dishes such as fish and chips and kidney pie, as well as a variety of sandwiches and a selection of American and English beers. In addition, Mr. Campion claims to have the largest collection of Scotch whiskeys outside of the British Isles.

Mr. Campion feels that “the key to the successful operation of a pub is the maintenance of a friendly, intimate ambiance.” He would like to personally oversee the operation of each pub, but that has become impossible as the chain has grown. Because of this, Mr. Campion has invested in hiring top quality managers, most of whom are from England. Despite the care Mr. Campion has taken, he still feels that he needs some mechanism to ensure that the food and service are of consistently high quality. To this end, Mr. Campion is considering four alternative forms of marketing research:

- A. A short questionnaire is placed on each table. Customers who have criticism, praise, or suggestions are asked to complete the form and give it to their server.
- B. A trained interviewer visits each pub on an unannounced basis. Selected customers are interviewed as they are leaving the pub.
- C. Mr. Campion contracts a customer experience firm. At the bottom of each customer’s receipt is the link to an online survey customers can complete and receive a discount on their next visit to the pub.
- D. None of the above. Instead, rely on posts to sites like Yelp and Facebook to assess customer satisfaction

Discuss the merits of these alternatives and indicate which, if any, you would recommend to Mr. Campion.

DISCUSSION CASE #5 Grand Seaside Resort

When the Grand Seaside Resort was built seven years ago, it was the most upscale and elegant resort hotel in Pensacola, Florida. Two years ago, a new resort opened nearby, and occupancy rates at the Grand Seaside began to decline. Rachel Griggs, Director of Customer Relations, analyzed hotel records and discovered that in the last two years the number of repeat customers was down. To increase repeat business, she decided to implement a customer satisfaction assessment program. Upon checkout, all customers would be asked to complete a short survey about their stay at the hotel. Below are three different questions that could be used to assess customer satisfaction. Which one should Rachel Griggs use? Be prepared to discuss the advantages and disadvantages of each of the options. Moreover, the manager also wants to know the level of measurement (i.e., nominal, ordinal, interval, and ratio) for each option. For the level of measurement, please read textbook Chapter 12.

Option 1:

Please think of all the things you are satisfied with and all the things you are dissatisfied with about your stay at the Grand Seaside Resort. Where would you rate yourself on the scale below?

Completely satisfied About half satisfied Not at all satisfied

100% 90% 80% 70% 60% 50% 40% 30% 20% 10% 0%

Option 2: Please answer the following questions based on your most recent stay at the Grand Seaside. Circle the answer that describes your experience at the hotel.

Was the room clean? Yes/ No

Was the room comfortable? Yes/No

Was the staff courteous? Yes/No

Was room service satisfactory? Yes/No

Was the parking adequate? Yes/No

Option 3:

If you had \$100 to give as a bonus to the people who served you during your recent stay at the Grand Seaside, how would you distribute the bonus? You can give as much or as little to each person or department, as long as the total for the column sums to \$100

Department	Amount
Front desk staff	
Room service staff	
Housekeeping staff	
Bellhop	
Concierge	
Reservations staff	
Restaurant staff	
Other	
Total	\$100

DISCUSSION CASE #6 — Mediacom

Mediacom is in the process of changing its package and pricing structure for cable TV and internet services. It has developed four media packages and wants to assess the relative attractiveness of these four packages in a representative sample of customers and potential customers in Columbia, MO. Their researcher is considering the following sampling procedures.

1. Include a survey with the monthly billing statement, along with a pre-paid postage reply envelope.
2. Do a mall intercept survey at Columbia Mall and survey 500 actual or potential Mediacom customers.
3. Conduct an internet survey. Respondents would be paid \$2 for completing a survey and would be recruited through banner ads on local newspapers, television, and radio websites.

Discuss how representative of the target population each of these approaches would be. Also, suggest a better option for collecting the data.
